DECORATIVE WALLS

WALL IS A REFLECTION OF
YOUR PERSONA

Metal wall textures

Neocoat Metallix is a technologically advanced epoxy-metal formulation to be used on walls to give breath-taking metal-effect coating. The 3K system is easy to mix and apply over prepared wall surface that can subsequently be polished to give unique texture and effect. It is fast-setting and non-sagging.

One of the most alluring things about metal is its ability to reflect high wavelengths of light. The natural reflective capacity via the shiny surface of metal creates a high visual impact within interior design.

From single tone to a mix of multiple tones, metal effect can be given to walls to create a character and a statement piece. Neocoat Metallix will provide an added ambience look and an instant wow effect.

Neocoat Metallix

- Excellent bond to various sub-strates
- Zero VOC and odourless
- Good resistance to chemicals.
- Reproduces the effect of metal surface
- Easy to clean and maintain.
- Can be sanded and polished to provide required texture or finish
- Patina or rust effect can be given on specific metals

Available metal powders with Neocoat Metallix

Aluminium

Brass

Tin

Iron

Copper

Bronze

Copper metal coating

NEOCOAT PMP

- Excellent malleability to have extended working time
- Easy to create embossed designs over stencils
- Suitable for indoor and outdoor use.
- Excellent adhesion, low shrinkage, fine surface finish
- Short curing period of 48 hrs
- Exhibits fine details when applied with texture or stamping mats

EMBOSSING WALL PUTTY

Neocoat PMP is a unique, polymer- modified, embossing plaster, specially designed to create designs on walls. Neocoat PMP is supplied with white cement and needs only addition of water. It gives an exceptional leveling putty to provide high strength and excellent finish. Optionally polymer can be added to obtain additional strength.

Neocoat PMP shall be applied on walls over which stencils or texture mats or rollers can be applied to provide great designs. Neocoat PMP stays malleable for a considerable amount of time to enable application of texture mats or stencils. Neocoat PMP can be applied on both interior as well as exterior surfaces.

3D WALLS

Today there are many ways to make your walls eye-catching: make a colorful statement wall, a wall with some 3D-effect mural followed by a glossy 3D epoxy coating.

Our **Neosealer HD** is designed to accentuate the high-quality 3D mural into a work of art. Our **Neosealer HD** coated wall will totally change the look and feel of the space around you and sure to create a “WOW” factor

It is always desirable to visually enlarge an interior by choosing a brighter color scheme which will lighten the room or decorating the space in the minimalist style. However, a much easier and faster way to achieve the desired effect and enjoy a more spacious interior is by using a 3d wall mural. It really has the potential to change the perceived size of a room. Either a picturesque landscape or an abstract picture can create a tranquil atmosphere or enliven the space. Choose your theme and we provide it.....

3D WALL

That Transforms your living room

Transformation of a 2-D picture into a 3-D look and feel involves proper selection, planning, quality of image and above all the application of a superior epoxy sealer that adds depth and character to the prosaic mural. **Neosealer HD** is a product that is so unique that converts the interior space beyond imagination.
