## Neoflor Ultra Terrazzo

**Our epoxy terrazzo** viz. Neoflor Ultra Terrazzo is unsurpassed in its performance characteristics such as compressive and flexural strengths, abrasion resistance and finishability. Neocrete's state-of-the-art Silicon hybrid sealer accentuates the performance in providing stain-free, glossy protection that is unmatched in the industry.

## Our Aggregates

Type of aggregates that are used

Marble chips (1mm till 6mm)

Glass chips (2mm till 6mm)

Pearl, gold & copper coated glass chips (3mm till 6mm)

## Our artisans at work

Any execution of floor needs a committed team, but more so for epoxy terrazzo. The skill, craftsmanship, attention to detail and passion in providing the best terrazzo floor is what makes Neocrete, a leader in this field. Our team boasts of having done more than 5 lakhs sq.ft of terrazzo in India, having mastered the art of providing superior floors.

# Polyacrylate Cement Terrazzo

---

It is conceptualized, designed, formulated and produced keeping the following three goals in mind:

- Environment-friendly
- Highly durable
- Should not crack

Highly suitable for high-traffic areas such as malls, departmental stores, offices, museums, railway-platforms and other such public utility spaces, Neoflor Ultra Cement Terrazzo can be used to provide stunning colours, designs and patterns

# Neostone D'Corez

## Think different

What makes Neostone D'Corez different from other terrazzo systems is its ability to withstand heat (>300°C), excellent sound absorption, expansive characteristics that allows the floor to be laid without divider strips, binder system consisting of synthetic cement with extraordinary strength. Breathtaking designs can be given.

## Synthetic Cement Terrazzo

Most environment-friendly, carbon-neutral, 100% natural material with no shrinkage, Neostone D'Corez is an ideal terrazzo floor for a variety of indoor applications. It is highly durable and remains unaltered for many years. Besides, this 10mm terrazzo system does not exert too much load on the parent surface.

- Formulated completely with mineral oxides mixed with marble chips and glass, Neostone D'Corez is eco-friendly with a capacity to bind with a wide variety of aggregates. They can be pigmented with an array of pigments to produce a long-lasting, natural aesthetic floor.
